

Information of enhanced elevator security

At Dai-Ichi Inn Ikebukuro, we are controlling elevators to strengthen security on the guest floor to ensure a safe and secure stay for our guests.

- ①When you get on the elevator, touch your room card key to the black sensor.
- ②When the sensor lights up, press the button for your accommodation floor.
- ③You cannot press buttons for floors other than your accommodation floors.
(except for the 2nd floor)

Thank you for your understanding.
